PROFILE SUMMARY

Seeking a position in the field of Software Development, where I can utilize my skills to further work towards personal and professional development and contribute towards the prosperity of the organization.

TECHNICAL SKILLS

Programming Languages: HTML, CSS, C, Java, Python

Databases: MySQL, PostgreSQL

O.S.: Windows, Linux, Ubuntu

PROJECTS

Snack Point of Sale System | *Python, MySQL, Flask*

- The *Snack POS System* is a web-based inventory and point-of-sale application designed to streamline the daily operations of a snack shop.
- Developed using the Flask web framework with MySQL as the backend database, this system provides an integrated solution for managing products, processing orders, handling users, and generating reports
- The goal of this project is to replace manual or fragmented tracking systems with a unified, efficient, and user-friendly platform that supports both administrative staff and shop employees

Netflix Clone | *HTML, CSS*

- The Netflix Clone aims to replicate the user interface of the popular streaming platform Netflix using HTML and CSS.
- The project focuses on creating a visually appealing and responsive design that mimics the layout and functionality of Netflix, including features like browsing movies and TV shows, viewing details, and navigating through categories.
- Focuses on front-end development.

Build an E-commerce Website | *HTML, CSS*

- Designed and developed a responsive e-commerce platform with user authentication, product listings, and a shopping cart.
